

# Release Notes

## AutoUpdate

### Version 18.0

Build	Module	Description	ID
21.03.18	AutoUpdate	Programs not visible due to a filter are no longer downloaded, even if they have been selected before.	12516

### Version 17.0

Build	Module	Description	ID
06.09.17	AutoUpdate	Settings for the use of proxy servers can now be made.	11734
13.06.17	AutoUpdate	The button "Install downloaded packages" is now always active. Inadmissible installation variations are meanwhile prevented by the installation wizard and the *.msi-files.	11467
13.06.17	AutoUpdate	A missing internet connection no longer causes a termination when starting the AutoUpdate.	11468
07.04.17	AutoUpdate	Modifications in the installation behavior of the base module in connection with the AutoUpdate for mixed installations of RIBTEC and abacus programs. All types of installations are now possible, only a single-user installation in combination with a client installation of a client/server solution is not supported due to technical reasons.	11278
16.02.17	AutoUpdate	The list of the available downloads can now be filtered by the version.	10973
20.01.17	AutoUpdate	The program <b>RIB structural engineering - Automatic updates</b> can be downloaded and installed separately. With this it is possible to download the latest programs and provide them for an installation without having to previously install the base module.	10000
