

Version 18.0

Build	Module	Description	ID
04.05.18	General	<p>As another program of the RIBtec product group, FERMO received a new graphical user interface. The hereby accompanying new handling concept offers a well-arranged input and displays almost all selected settings at a glance.</p> <p>This is achieved by modern handling elements such as the ribbon bar, a property grid for the input and display of structural member properties as well as by an interactive graphic display (plan view and views as well as 3D overview).</p>	12499
