

Version 19.0

Build	Module	Description	ID
25.04.19	General	Program maintenance and support	13459

Version 18.0

Build	Module	Description	ID
21.03.19	User interface	No more intermediate points are set when modeling horizontal soil horizons and water levels, in order to ensure a safe and correct definition of the soil horizon polygons.	13374
23.03.18	Analyses	The maximum number of slip circles to be processed per calculation has been optimized in order to enhance the performance in the graphic user interface.	12465
16.02.18	General	Program maintenance and support	12359

Version 17.0

Build	Module	Description	ID
10.01.17	General	Program maintenance and support	11070
